

# Energy Star® and Limited Warranty

## Energy Star® for skylights

Canada has adopted a simple, single zone criteria for Energy Star rating.

VELUX has the best selection of Energy Star certified skylights and Sun Tunnels. Not only do we have products that meet Energy Star to save your clients money but they are all rigorously tested to perform in the harshest and most extreme climates. See pages 42-43 for specific Energy Star by product.

All Energy Star® certified skylights are required to have a maximum U-factor value of 2.29 (metric) or 0.40 (imperial) and meet factory inspections. Energy Star® certified skylights are more energy efficient than what most local building codes require.

VELUX also has the **VELUX Energy Series VES** with products that have extremely low performance U-values.

For more information on Energy Star visit [www.nrcan.gc.ca/energy](http://www.nrcan.gc.ca/energy)

## Certifications

VELUX Skylights and Sun Tunnel Skylights, including VSS, VSE, VS, FS, VCS, VCE, VCM, FCM, TMR, TGR, TCR, TMF and TGF have been tested to the following standards and the results have been third party certified.

- **AAMA/WDMA/CSA 101/I.S.2/A440-08** NAFS – North American Fenestration Standard/Specification for Windows, Doors, and Skylights
- **A440S1-09** Canadian Supplement to AAMA/WDMA/CSA 101/I.S.2/A440, NAFS
- **NFRC 100** Procedure for determining fenestration product U-factors.

WDMA  
Hallmark Certified

### VELUX Commercial Warranty

See [velux.ca](http://velux.ca) for full warranty details

Limited labour warranty included. See [velux.ca](http://velux.ca) or call for full warranty details.

## Notice

All glass may be subject to unexpected and spontaneous breakage in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX. VELUX offers the choice of laminated or tempered glass skylights. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB) or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces. When tempered glass breaks, pieces of glass come loose and may strike an individual. Consult local regulations and/or building material consultants to determine which type of glass is right for you or if laminated glass is required in your application.

The pricing listed is suggested retail, dealer may sell for more or less. Shipping to the dealer is included on all skylight, Sun Tunnel Skylight and roof window orders. Shipping is excluded on commercial skylight orders. All other orders are subject to a \$15 freight charge.
